WOODEN FINISH

Wood-grain coating for premium residential entrances, villas and boutique frontages.

Applications

Shops & Showrooms

Warehouses & Godowns

Factories

Residential Garages

Parking Entries

Institutions

How to Estimate Your Shutter

Double Wall Slats

1. Convert feet → inches → mm (1 ft = 304.8 mm).
2. No. of DW slats = total height ÷ 80 mm.
3. Slats × standard length × price = slat amount.
4. Side guide × 2 pcs × price = SG amount.
5. Bottom profile × standard size × price = BTM amount.

Total = Slats + SG + BTM + End Caps

Single Wall Slats

1. Convert feet → inches → mm.
2. No. of SW slats = total height ÷ 77 mm.
3. Slats × standard length × price = slat amount.
4. Side guide × 2 pcs × price = SG amount.
5. Bottom profile × standard size × price = BTM amount.

Total = Slats + SG + BTM + End Caps

Standard lengths: slats & bottom profiles 3.2 / 4.2 / 5.2 / 5.8 m · side guides 3 / 4 / 5 / 5.8 m. Custom lengths on request.
Specifications subject to change without notice. **For current rates refer the SIE Shutter Profiles & Transparent Shutters Price List.**
Transparent / polycarbonate shutter systems are covered in the separate **SIE Transparent Rolling Shutters** catalog.
