

SMART INDIA ENTERPRISES

PRODUCT CATALOG

A photograph of a large industrial building entrance with a glass door. A white, automated door opener is mounted above the door. The interior of the building is visible through the glass, showing a warehouse with high ceilings and metal shelving units. A red semi-transparent banner is overlaid at the bottom of the image.

ENTRANCE AUTOMATION

ABOUT US

Smart India Enterprises (Smartie) is a premier automation company based in Mumbai India, with over twenty years of industry experience. As a proud member of the MK family (since 1980). , we bridge the gap between manufacturing competency and technological agility. Our mission is to redefine property solutions by blending innovation, technology,

We have wide range and complete solution for all type of Entry solutions, for Industiral , Commercial and Residencial premises,

PRODUCT RANGE

Entrance Automation

Industrial solution

Automatic Gate, Boom barrier, Dock shutter, Dock shelter, Dock lever, Sectional doors, Highspeed doors, Foldup doors, Rapid Doors, Retractable Gates, Sliding Doors, fire shutters, fire curtain, antidust doors, fire doors and clean room doors. puff insulated shutters, Acoustic doors, Anti radiation doors.

Residential & Commercial solution

Automatic Gate, Parking Boom barrier, Folding doors, sliding and swing doors, Sliding Doors, transparent doors, transparent shutters, Aluminium and metal shutters, Roof top skylight shutters, retractable roof, fire doors

PVC HIGH SPEED FOLDUP DOORS

Designed and manufactured by Smart India Enterprises (Smartie), our PVC fold-up doors represent the pinnacle of industrial entrance automation. These high-performance folding doors are specifically designed Industrial and commercial solutions. providing a seamless, high-security solution for demanding environments. Engineered with precision and craftsmanship, they offer a "bigger, better, faster, and stronger" approach to space management, ensuring operational efficiency without compromising on aesthetic appeal. Whether for industrial or commercial use, our PVC fold-up doors are built to the highest standards,

Sealing: Use of U-shaped airbag cloth pockets at the bottom for uneven ground and double-row brush seals on the sides of the door frame.

Fabric: High-strength PVC coated fabric (typically 0.8mm to 1.5mm thickness).

Speed: High-speed operation (0.8m–1.5m/sec) to minimize exposure time.

Safety Devices: Standard infrared photoelectric protection, emergency stop buttons, and pressure airbags.

DOCK SHUTTERS SECTIONAL DOORS

In an era where every second dictates the bottom line, Smartie's High-Speed PVC Doors represent the pinnacle of industrial efficiency. These aren't just entrances; they are precision-engineered flow systems. With ultra-fast cycle times and a sleek, minimalist footprint, they maintain the integrity of your controlled environments while ensuring your logistics never skip a beat. Velocity meets reliability.

- **Rapid Operation:** High-speed motorization reduces waiting times and minimizes energy loss during loading/unloading.
- **Durability for High Traffic:** Constructed with reinforced galvanized steel or aluminum slats to withstand rigorous daily use and harsh weather conditions.
- **Weather Protection:** Integrated side seals and bottom gaskets prevent dust, rain, and pests from entering your facility.
- **Seamless Integration:** Fully compatible with dock levelers and shelter systems for a complete, automated loading bay ecosystem.

HIGHSPEED PVC SHUTTERS

Smartie's Sectional Doors are the premier solution for modern warehouses, logistics centers, and commercial garages. Designed to slide vertically and stow compactly along the ceiling, these doors maximize your usable floor space while providing superior insulation.

- **Curtain Material:** High-tenacity polyester fabric 750GSM to 1300GSM with a PVC coating; flame retardant (M2/B2 grade) and UV stabilized. EN standard
- **Kinematics:** Opening speeds up to 2.5m/s and closing speeds up to 0.8m/s via frequency-inverter-driven geared motors.
- **Wind Resistance:** Integrated lateral stiffeners (aluminum or composite) providing resistance up to Class 2 or 3 (EN 12424).
- **Drive System:** IP55 & IP67-rated asynchronous motors with electromagnetic brakes and absolute encoders for precise limit positioning.
- **Control Logic:** PLC-based control panels with variable frequency drive (VFD) for soft start/stop cycles, reducing mechanical wear and increasing motor longevity.

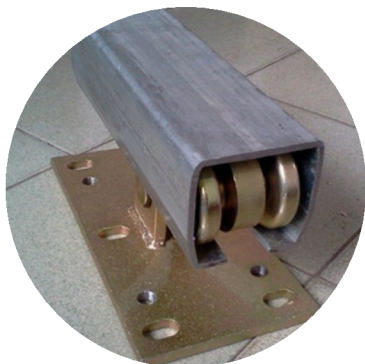

MOTORIZED ROLLING SHUTTERS

The Smartie Rolling Shutter Series is engineered as a high-security perimeter solution designed for large-scale industrial, commercial, and residential openings. Each system features a curtain composed of interlocking slats, precision-profiled to ensure smooth articulation, silent operation, and high longitudinal stiffness against physical impact and wind pressure.

Our extensive range offers a versatile selection of materials and designs, including High-Grade Metals, Durable PVC, and Specialized Grills. Whether your project requires Opaque slats for maximum privacy and security or Transparent/Polycarbonate slats for high-visibility retail displays, we provide a tailored solution.

GATE & AUTOMATION

The Smartie Gate Automation Series fuses heavy-duty engineering with intelligent logic to secure industrial, commercial, and residential perimeters. Our range features high-torque Sliding, Swing, and Cantilever systems, alongside specialized Heavy Hanger, Soundproof Acoustic, and Anti-Radiation gates. Every bespoke solution is built for extreme durability, utilizing oil-bath gearboxes and reinforced rack-and-pinion drives to ensure vibration-free operation and superior structural stability.

DOORS & AUTOMATION

delivers high-precision entry solutions for the most demanding architectural and industrial environments. Our portfolio features high-torque Sliding and Swing door operators, alongside advanced Telescopic systems for wide openings with limited side room. For spaces requiring maximum clearance without ground interference, we specialize in Trackless Folding doors and high-performance Stainless Steel and Transparent Glass systems, ensuring every entrance reflects a perfect balance of security, aesthetics, and fluid movement.

SPECIAL RANGE

skylight roof

Pakring barrier

PVC roof top

CLIENTS

35+ DEALERS ACROSS INDIA.

MORE 500+

SUPPLY EXPERIENCED KSA, NEPAL, BANGLADESH, UAE & AFRICA
